

ERP Services - SAP

Brilliant Factory Solutions for Grid Solutions –Stafford, UK

Business Outcome: Responsive Production Scheduling, Optimized WIP inventory, Increased product traceability & higher quality components

Business Challenges

Higher TAT
Production scheduling was order based instead of operations based leading to higher TAT

GE Power

Production delays
Manual scheduling & production order confirmation leading to Production delays

Component Traceability
Complete traceability of components on the shop floor by enabling serial number tracking

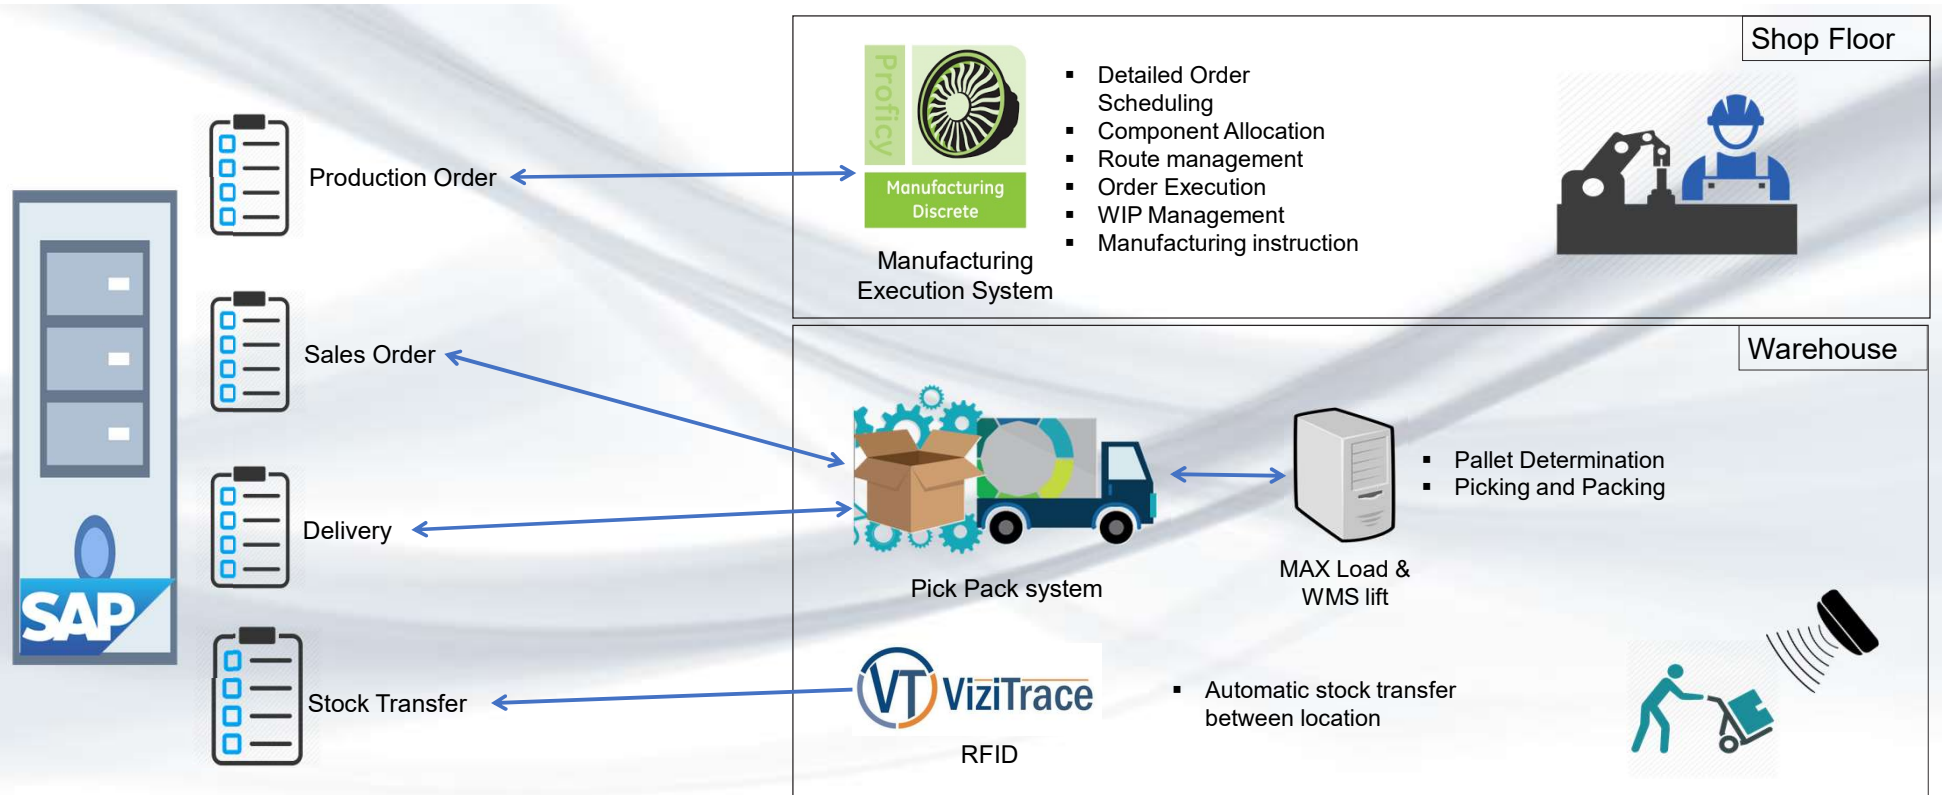

Grid Solutions

Lack of visibility - WIP
Lack of visibility on Work In Progress due to delayed production confirmation and less than optimal scheduling process

Real Time Shop Floor – Warehouse Integration Solution

Features & Benefits

Improved Production Turn Over Time
